

LIGHTNING LANE TIPS

What Lightning Lane Multi Pass Is

Lightning Lane Multi Pass is a paid service that allows you to select return time windows for select attractions so you can spend less time waiting in standby lines.

At Disneyland Resort, it is available for select attractions at both Disneyland and California Adventure and also includes Disney **PhotoPass** downloads for the day.

Pricing starts at **\$34** per person, per day, but prices can vary by date.

How to Purchase Lightning Lane Multi Pass

You can purchase Lightning Lane Multi Pass in one of two ways:

Before your trip:

Add it to all park days as part of a Disneyland vacation package

Day of your visit:

Purchase it in the Disneyland app after you have scanned into the park

Once you have scanned into the park and purchased Lightning Lane Multi Pass, you can make your first attraction selection.

The Basic Booking Rule

After you book a Lightning Lane, you can book your next one:

Option 1: After you scan into your current Lightning Lane attraction
or

Option 2: 2 hours after making your last selection

Whichever comes first.

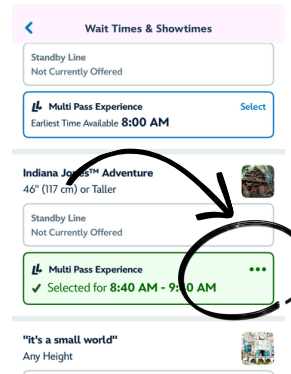

This is why I recommend setting a 2-hour timer after each booking if your next selection is not available right away.

How to Modify a Lightning Lane

You can modify a Lightning Lane return time if the current time does not work for you. **In order for the Lightning Lane portions to work out ideally, your return times need to line up with this general flow. If they do not, go back into the app and use the modify option to look for a better time. This can take some refreshing, so check back when you are walking, waiting in line, or taking a break.**

To modify:

1. Open the Disneyland app
2. Go to your upcoming Lightning Lane selection
3. Tap the three dots
4. Choose Modify Plan
5. Select a new available return time

Modifying can be used to move a return time later or to look for an earlier time. Important: Modifying does not reset your 2-hour booking window. Canceling does. *So if you want to keep your place in the booking cycle, modify instead of canceling whenever possible.*

Lightning Lane Single Pass

Lightning Lane Single Pass is separate from Lightning Lane Multi Pass and costs extra. At Disneyland Resort, the current Single Pass attractions are:

Disneyland:

Star Wars: Rise of the Resistance

California Adventure:

Radiator Springs Racers

Pricing and availability vary by date and attraction, but these often range around \$16–\$29 per person.

You do not have to purchase Single Pass to use this park plan, but it may save time if one of those attractions is a high priority for your family.
